E-commerce Development

Understanding the importance of the internet nowadays is a crucial, especially because of its potential on publishing and sharing information of all kind, all over the world, and that's the thing that can change the way we business.

Having a website doesn't have to only provide commercial information about your company products or services, it can provide services online as well. Having an electronic commerce (e-commerce) allows simple and reliable solution for selling your business on online services, secure credit card payment on your website.

All Ecommerce platforms that we build have Secure Socket Layer (SSL) encryption that provide protection for our clients and their customers and keep the online marketplace as safe as possible.

Always trying to fit our client needs, numerous of them have leveraged from our user-friendly interface, well-designed menus, filters, sorting options, and other desired options we put there for them.

You don't have to have all the details, a simple gesture of good will is enough for us to make your business growth.

Search Engine Optimization (SEO)

Almost 93% of people search what they need online. Studies by global researcher Forrester had shown that 65-80% of internet traffic is commanded by Google, which means that ranking on Google is important, because approximately 75% of users do not scroll beyond the first page when they are searching for anything online.

That why our team of SEO experts works to help you increase your visibility online, which makes your page easy to find on the Internet and that is when your website becomes effective tool for marketing Increase ROI (Return On Investments) or to put it simple, that's when your sales become to grow.

TetaSolutions provides our client:

- *Analyze of the current website (analyze of key words, content, source code,...)*
- *Adjustment of the website to be more SEO optimized*
- *SEO friendly urls*
- *Monitoring and analyzing continuously*

You should know that this is a process, not an event, but this is the kind of process that is worth taking for long terms results.
